

Bill has been in and out of Amateur radio since 1979, whenever time and life gave him a break for a bit. This is his second period as a Amateur Radio Licensee. He worked as a Communications specialist in the 1980's , and opened his own successful communications company in the early 1990's. About 1995 he got interested again in Amateur Radio.

Bill's Personal interests include... Drag Racing 60's Muscle Cars.... Collecting 50-80's 45 rpm records.. .. He DJ's (DJ Gonzo)various Rockabilly and Swing Dance events in and around NYC!..Fortunately he has a very supportive wife who loves to ride and support his crazy hobbies... He has been a avid antenna experimenter since he was a kid, He built and used dozen upon dozens of Wires,Verticals,Yagi's,Loops and with his favorite being Cubical Quad antennas. When he is not outside putting up an antenna or two, he is inside modeling them. He has modeled at least 400 antennas, including just about every commercial HF antenna ever made.

Bill's radio is an Icom 7851 and current antennas are a 4 element 10-20 meter multiband Cubical Quad at 75 feet, A 40 meter loop, and at his other QTH a 6 element 36 foot boom 10 meter Cubical Quad at 75 feet a 10-40 Hexbeam. Also a 7 element 40 foot boom yagi. For 80 meters he uses various wires at both locales. He always runs stock power (200 watts) with no Amplifiers.
